Email Archive

Email Volume is Growing

The volume of email your business has to process has grown over 500% in the last 10 years and there appears to be no decline in sight. It is likely the amount will continue to increase, pushing your organization's email servers to the limit, resulting in costly downtime and reduced productivity. Of even greater concern are industry-wide legal and regulatory requirements mandating that you retain all your organization's email in an unalterable state.

A comprehensive email archiving solution will not only help you meet corporate, legal and regulatory requirements, it can also help your organization achieve other critical goals.

- Simplify mailbox management, shrink storage costs and reduce backup windows
- Protect critical business information and intellectual property
- Accelerate legal discovery and enforce corporate email policies

EdgeWave has the Solution

EdgeWave Email Archive is a secure enterprise SaaS solution for storage management that retains your email in an unalterable state to help meet compliance requirements, provide litigation support and meet corporate best practices guidelines. EdgeWave's policy-based archiving and built-in reporting features combine with easy-to-use management tools to assure your archived messages are indexed and easy to retrieve whenever you need them.

EdgeWave's feature-rich email archiving supports client software integration, email stubbing to maximize server storage, mobile archive access, litigation support tools, centralizing, importing all historical emails and more.

EdgeWave Email Archive supports all major messaging servers including Exchange, Domino, GroupWise, and Linux-based environments and can be deployed easily with minimal resource expenditures. Your archived email is hosted in a secure environment with industry-leading archiving performance, high availability, and disaster recovery. Data is encrypted as it leaves your corporate networks, to be stored in our secure archive with 128-bit encryption.

Highlights

- Pure Hosted Service – no software or hardware required
- Archives data in an immutable state to help meet regulatory requirements for SEC, FINRA, NASD, HIPAA, SOX, GLBA, as well as legal evidentiary rules and your internal guidelines
- Provides storage of all messages - both inbound and outbound
- Provides disaster recovery for your critical email infrastructure
- Features a highly secured network with 128-encryption for all data
- All data is searchable at all times. No data is moved offline
- Easy to configure and use – no training is required
- All data is kept in customer-specific data silos – no co-mingling of your data with other customers
- Data is replicated between two US-based data centers with an unrivalled up-time performance
- Supports all major messaging servers: Exchange, Lotus Domino, GroupWise, Scalix, Postfix, Kerio, Zimbra, Qmail, Imail, Sendmail, etc.
- Supports all hosted email platforms: Google, Microsoft BPOS, Cisco Webex Mail, Intermedia, Apptix, AppRiver

Features

Unrivalled Security and Privacy

EdgeWave Archive secures data at three levels, physical infrastructure, data encryption, and the application layer, to assure that data is always secured in transit and at rest. Our data storage is secured via industry standard encryption. There is never any co-mingling of archived data between customers. At the application layer, we use Secure Socket Layers (SSL) to encrypt all communication between the web browser and the data center, and a processing pipeline that insures performance and data privacy among all customer accounts.

High ROI, Low TCO

EdgeWave Secure Archiving has a low fixed cost per user for annual or multiple year subscriptions that makes planning easy. Migrating your data into the cloud allows you to reduce your internal storage and maintenance costs by reallocating or eliminating on-premise or hosted servers. You also avoid compliance fines and fees associated with data loss, while reducing the costs associated with eDiscovery and analysis by leveraging our easy-to-use management interface for early case assessment.

Easy-to-Use

With no hardware to buy or software to install, you can be up and running instantly. The simple and intuitive web-based interface makes set-up easy and rapid search and retrieval is possible by individuals in a personal archive or by authorized users across your entire archive, without burdening your IT staff.

Robust Technology – Fastest Search and Retrieval

EdgeWave Secure Archive uses cloud-compute infrastructure for scalability and reliability. Our unique and differentiated cloud-compute software stack harnesses on-demand CPU and geographically dispersed storage to power archival functions for data ingestion, indexing, search, eDiscovery and export. The EdgeWave system uses map-reduce style parallel processing to search very large data sets in sub-second response times. Parallel processing is only possible with cloud-compute CPU, because of its ability to scale up in real-time. This makes every search experience rapid with no waiting for jobs to complete.

Other EdgeWave Messaging Security Services

Email Security

Email Security provides unrivalled email defense against internal and external threats such as spam, viruses, spyware, phishing schemes, identity theft, and other dangerous or offensive content.

Email Continuity

EdgeWave Email Continuity provides an uninterrupted flow of your email stream in case of unplanned or planned shutdown.

Email Encryption

EdgeWave Email Encryption services assure the secure delivery of your email in accordance with your organization's Security Policy, and provides confirmation of message delivery. Comprehensive reporting offers message tracking and an audit trail to support regulatory and other requirements.

Data Loss Protection

This data protection technology analyzes data being sent out of your network to detect private content in data in motion and prevent sensitive and protected data from leaving your company.

For more information see individual data sheets covering each of the above service in the EdgeWave Messaging Security Suite

About EdgeWave

The EdgeWave portfolio of Web, Email and Data Protection Technologies deliver comprehensive secure content management to 6,500 customers worldwide. Our award-winning iPrism Web Security and EdgeWave Email Security products are now complemented by Email Archiving and Data Protection Solutions, delivered as hosted, on-premises, and hybrid services. EdgeWave solutions protect your organization's bottom line with unrivalled ease of deployment and the lowest TCO on the market.
